RITICS

Research Institute in Trustworthy Interconnected Cyber-physical Systems

Quarterly Update

July 2019

Project and Research News

The seven RITICS projects funded from the NIS Directive Call and Open Call are all underway, and are making good progress.

Progress reports have so far been received from 4 of the 7 universities: Glasgow University, Birmingham University, De Montfort University and City University.

The reporting schedule and payments schedule has been updated and communicated to the investigators and NCSC.

Reports should be sent to us on a quarterly basis, and payments will be made also on the same quarterly basis. There will be a final report, and a final payment, for each project. Please ensure your progress report is sent through on time to ensure prompt payment of your grant funds for that quarter.

RITICS reaches the world of social media

Twitter: The RITICS Twitter site has been launched and the handle is @RITICS2

Facebook: The RITICS Facebook site has also been launched and the new website is www.facebook.com/RITICS

Instagram: The RITICS Instagram site has been launched and the Instagram handle is ritics6.

Please join and check out these sites now, and invite people from your network to join.

New RITICS brochure has been published

The 2019 edition of the RITICS brochure has just been published. This includes summaries of all the current projects and the leading academics on the projects. Copies will be provided at meetings including the forthcoming Autumn Showcase 2019.

A new edition of the RITICS newsletter will be published in the summer of each year, and in the forthcoming years they will discuss research outputs.

Forthcoming events

RITICS Autumn Showcase

Initial plans are being made for the RITICS Autumn Showcase 2019. This is planned to take place on Monday 14th October 2019 at the Clarke Suite, Nova South, Victoria, London.

Talks will be given by all the 7 active projects in RITICS phase 2. There will also be a panel discussion on forensics, and keynote talks.

By this stage we should have a substantial body of results from the RITICS projects, that will be presented during this meeting.

Registration will open soon, and a detailed programme will be put together over the next month or so.

Joint RISCS/RITICS workshop

Plans are underway for a joint RISCS/RITICS workshop. Please check the RITICS website for more details as they appear.

Venue and date are still under discussion – potentially October 2019?
